

Information Data Sheet

Category Bomb (British)
Type 10lb Practice Bomb

Variants 3

Body Dimensions 76.2mm x 177.8mm (3" x 7")

Weight 10lb

Fuze Simple, integral striker assembly

Description White overall with two light green bands around tail cone. Solid cast-iron nose with an axial bore housing the striker head and rod, with a guide bush threaded into the rear cavity, and internal rear threads to take the central plug. The tail cone is closed at the rear by a conical tail plug, and at the front end by the central plug to which it is attached. Detonator burster (10 grains fulminate of mercury and 7 C.E. pellets).

Function The bomb Mk 1 used a smoke filling for daylight practice operations. Mk 3, with flash filling, was used for practice night bombing.
